REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicant's election with traverse, of Group I, claims 1 and 10 (new) filed in the response on 9/30/05 are acknowledged. Applicant's traversal on the restriction requirement is found to be convincing. Accordingly, claims 1-10 are under consideration in this application.

Prior art of record, taken alone or in combination, do not fairly suggest or disclose the instant lactone ring-containing (meth)acrylate compound, polymer and resist composition derived therefrom. Closest prior art, US 6,517,994 B2, hereby made of record, teaches a polymerizable lactone-ring containing (meth)acrylate, wherein the substituents corresponding to the instant R^2 are hydrogen atoms. There is insufficient motivation provided in US 6,517,994 to replace the hydrogen atoms with the claimed straight, branched or cyclic monovalent hydrocarbon group having 1 to 10 carbon atoms (i.e. methyl groups in claim 10), or two R^2 bonding together to form a ring structure as presently recited. Accordingly, the instant invention as defined by claims 1-10 are allowable with respect to prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
